PROFESSIONAL EXPERIENCE

Senior Technical Support Engineer

ITechwx | Jul 2025 - Present

- Provide advanced technical support for enterprise customers, resolving complex software, system, and connectivity issues.
- Act as an escalation point for high-priority incidents, ensuring timely resolution and customer satisfaction.
- Perform root cause analysis for recurring issues and recommend corrective actions to minimize future occurrences.
- Troubleshoot Windows operating systems, Microsoft applications, user authentication, and network-related issues.
- Collaborate with engineering and product teams to investigate and resolve critical customer-reported defects.
- Maintain compliance with service delivery standards, incident response procedures, and organizational policies.
- Contribute to process improvement initiatives that enhance operational efficiency and service quality.
- Mentor junior engineers and provide technical guidance on complex support cases.
- Consistently meet or exceed customer satisfaction and SLA targets.

Technical Support Engineer

ITechwx | Oct 2024 - Jun 2025

- Diagnosed and resolved technical issues across Windows environments and enterprise applications.
- Managed customer incidents using ticketing systems while ensuring adherence to SLA commitments.
- Investigated software defects, application failures, and configuration issues to identify effective resolutions.
- Assisted customers with Microsoft 365 applications, including Outlook, Teams, OneDrive, and Microsoft Office functionality.
- Performed user account administration, access troubleshooting, and authentication support.
- Coordinated with senior engineers and development teams to resolve complex technical issues.
- Documented troubleshooting procedures and contributed to internal knowledge-management resources.

- Delivered high-quality customer support through effective communication and problem-solving skills.

Co-Founder

ULTRAPOL Billiards | 2024 - Present

- Manage end-to-end business operations, customer experience, and technology infrastructure.
- Administer network equipment, wireless connectivity, printers, POS systems, surveillance systems, and workstations.
- Troubleshoot and maintain IT infrastructure to support business continuity and operational reliability.
- Implement preventive maintenance practices to reduce operational downtime.
- Analyze business performance metrics and identify opportunities for process improvement.

Sales Manager

Manulife Investment Management | 2022 - 2023

- Built and maintained relationships with insurance partners and healthcare professionals.
- Managed claim follow-up activities and coordinated payment-resolution processes.
- Pursued sales goals through customer acquisition, retention, and cross-selling initiatives.
- Provided training, coaching, and day-to-day guidance to new team members.
- Contributed to business growth through customer-focused sales strategies.

Project Intern

Katalon Studio | Apr 2022 - Aug 2022

- Assisted in designing and developing AI-based solutions intended to improve user onboarding experiences.
- Conducted market research and analyzed industry trends.
- Monitored website traffic and evaluated website performance metrics.
- Contributed data-driven insights to support business decision-making.

EDUCATION

Bachelor of Information Technology

RMIT University | 2018 - 2023

ADDITIONAL PROJECTS & TECHNICAL EXPOSURE

Microsoft 365 & Endpoint Management

- Assisted users with Outlook, Teams, OneDrive, and Microsoft Office application troubleshooting.
- Supported device enrollment and management activities in Microsoft Intune.
- Investigated authentication and access issues using Microsoft Entra ID.

Windows Troubleshooting

- Resolved operating-system performance issues, software installation failures, driver conflicts, and update-related incidents.
- Performed advanced troubleshooting using Event Viewer, PowerShell, and system logs.

Networking

- Troubleshot DNS, DHCP, VPN, proxy, and general connectivity issues.
- Assisted with router, switch, and wireless network configuration and support.
